

Psychomotoricity

In collaboration with Valentina Petrone of Psychomotoricity Settimo, Sisport organizes course of psychomotoricity

Enrollment from the 5th of September until the depletion of vacancies

Psychomotoricity is an activity that aims to improve the development, maturation and expression of the child's potentiality at a motoric, cognitive, relational and emotional level.

Psychomotoricity's paths lead the child from early childhood, supporting his/her growth and accompany him/her in the process of identity development.

Free trial lessons

In each session, the child can experience different things with the body and acquire awareness of his/her own abilities, in a safe and welcoming environment, while respecting the child's own time to reach these objectives.

The activity will take place in a group to encourage creativity and the desire to compare with the external world. In this way, the child will learn to feel at ease with him/herself and with others.

The paths of "**Spazio cuccioli**" are meant for children from 21 months to 3 years old accompanied by parents. The courses will give children the chance to play and move freely following the methodology, the thought and the sensibility of the relational psychomotoric practice in an environment that guarantees welcoming, well-being and focuses towards the creation of relations.

The paths of "**Gruppo**" are meant for children between the age of 4 and 7 and they represent an educational space that focuses on expression and socialization. By using the body children will experience, express, live and give shape to their own needs, desires and fears, encouraging imagination and creativity.

The doctor Valentina Petrone is a professional of relational psychomotoric practice in the socio-educational area that conducts with professional ownership and autonomy psychomotoric interventions and primary prevention in the city of Settimo Torinese and the surrounding area of Turin.
